Release Notes GC-PrevuePlus v12.4

Table of Contents

New Features

Full screen mode

In order to provide additional flexibility for automation development we have created a full screen mode that hides all windows except for the graphics windows

On Line Help

All products have finally had their On Line Help files updated to the HTMLHelp format, allowing the Help file to appear within the product again.

Items Fixed since v20.3.6

This list is customer reported issues fixed for this release.

#151   Resolved an issue whereby some dialogs could not be resized when using the XP operating system.

#144   Fixed issue that prevented the initialization of the Workflow browser on some PC configurations.

#124   Now ignoring job units when an RS-274X file without express unit definition is encountered. Now defaulting to inches in this case.

#108   Updated translation strings for Traditional Chinese version of products.
