Release Notes   GC-Prevue v23.3

Table of Contents

Items Fixed since v23.2

This list is customer reported issues fixed for this release.

#123   Scrollbars now correctly behave within the graphics window.

#122   Resolved an issue with a crash caused by a user-created toolbar within all products.

#102   Similar issue to #76. Aperture list conversion failed. The issue was caused by upgrading to a newer development environment.

#92   Resolved problem whereby GC-Prevue failed to close correctly, leaving an open instance in the Task Manager.

#76   Importing aperture list using Aperture List Assistant previously caused crash. Issue fixed.
